

# Yash Life Sciences Ltd

- **Yash Life Sciences is an indelible hallmark corporation bound by its solemn duty of manufacturing quality and affordable medicines.**
- **Yash Life Sciences is a commitment to mitigate the suffering of the disadvantaged. We are manufacturing and delivering essential medicines of the highest quality to the community.**
- **Yash Life Sciences aims to reach over the horizon. With trusted vision, strategic insights and increased proficiency, the services would expand to other parts of the world.**
- **Yash Life Sciences will uphold the highest standard of Honesty and Integrity in everything it does.**

## State of The Art Manufacturing plant

- 📍 Since its inception in August 2019, Yash Life Sciences has made significant footprint in the local market with household brands like Triphen, Trilyn, Trisept and a wide range of essential generic medicine.
- 📍 To drive innovation we have a highly inspired and curious team of people very imaginative who are encouraged to bring a paradigm shift aimed at operational excellence to deliver quality medicines with Love and care.

📍 We are proving to be one of the major quality employment generators in the industry and the saga will continue with business growth and demand.

📍 Our focus is central to the science of innovation and research. We are eager to collaborate across scientific and geographical boundaries so that newer and breakthrough technologies are adopted to augment treatment goals.

- Supply Chain Management

Yash Life Sciences with rich experience in distribution network has been proactively advocating the fundamental issue of access to medicine through a robust supply chain network. Our strategic geographical location in Zambia can promptly supply essential medicines to the entire neighborhood in the shortest possible time compared to imports from anywhere else in the world.
